	Examiner		Art Unit	
	Philip C. Tucker		1712	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 December 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 and 14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 8-12 and 14 is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2131067.

GB '067 teaches an oil-based drilling fluid which comprises a hydrocarbon, a latex and an emulsifier within the scope of the present invention (see the examples and page 1, line 57 – page 2, line 4). Applicants intended use in sand formations does not distinguish over the prior art (In re Pearson 181 USPQ 641).

3. Claims 1, 4, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Patel (4740319).

Patel teaches an oil-based drilling fluid which comprises a hydrocarbon, a latex and an emulsifier within the scope of the present invention (column 6, lines 1-53). The examples teach up to 5 ppb of latex material, which would be at least within the scope of greater than about 0.1% of claims 5 and 7. Applicants intended use in sand formations does not distinguish over the prior art (In re Pearson 181 USPQ 641).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2, 3, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2131067 or Patel (4740319).

GB '067 and Patel are described above. GB '067 and Patel differ from the present invention in that the specific size of the latex particles are not disclosed. The latex in both references is used in fluid loss control. It would be obvious to one of ordinary skill in the art to vary the size of the latex particles of Patel or GB '067, in order to optimize the fluid loss control of such particles, in various formations encountered when drilling.

6. Claims 8-12 and 14 are allowable over the art of record.

7. Applicant's arguments have been considered but are not deemed persuasive. Applicant has argued that the latex of GB '067 and Patel are not deformable. It is noted that the same polymers are used in the present invention as in GB '067 and Patel, and thus such must be able to form a deformable latex as in the present invention, unless applicant can provide a showing otherwise. Although GB '067 adds an emulsifier, so does the present invention. An emulsifier will stabilize the latex system to some extent

Art Unit: 1712

in both GB '067 and the present system. One of the properties of the GB '067 system is the prevention of fluid loss. The polymer would have to contact the formation in order to prevent fluid loss, and thus all of the polymer of GB '067 cannot stay in the fluid. It is further believed that under various conditions of temperature and pressure that almost all latexes would be capable of being deformed. Since no specific conditions are given for the deformation, such ability to deform is not seen as distinguishing, particularly in view of the same polymers being used as in the present invention.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

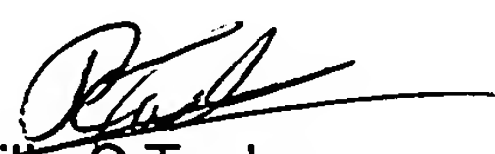

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Art Unit: 1712

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip C. Tucker whose telephone number is 571-272-1095. The examiner can normally be reached on Monday - Friday, Flexible schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
